Top 30 Average: 47.49

Plot Average: 43.80

Comments: An extremely wet spring made for poor planting conditions and slow early growth. Temps warmed in July, through harvest, but rainfall stopped after July 15th. Leon stated that he had less than 0.5" rain after mid-July. His beans averaged low to mid-40's. Hail fell about 8 miles north, dropping bean yields to 20 bpa and corn to less than 100 bpa.
